

NOVAGOLD

2024 PDAC CONFERENCE

March 3 – 6, 2024

CAUTIONARY STATEMENTS

REGARDING FORWARD-LOOKING STATEMENTS

This presentation includes certain "forward-looking information" and "forward-looking statements" (collectively "forward-looking statements") within the meaning of applicable securities legislation, including the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible", and similar expressions, or statements that events, conditions, or results "will", "may", "could", "would" or "should" occur or be achieved. Forward-looking statements are necessarily based on several opinions, estimates and assumptions that management of NOVAGOLD considered appropriate and reasonable as of the date such statements are made, are subject to known and unknown risks, uncertainties, assumptions, and other factors that may cause the actual results, activity, performance, or achievements to be materially different from those expressed or implied by such forward-looking statements. All statements, other than statements of historical fact, included herein are forward-looking statements. These forward-looking statements include statements regarding the anticipated timing of certain judicial and/or administrative decisions; the 2024 forecast spending; the timing and potential for a new feasibility study on the Donlin Gold project; our goals, planned activities and planned expenditures for 2024; ongoing support provided to key stakeholders including Alaska Native Corporation partners; Donlin Gold's continued support for the state and federal permitting process; the potential development and construction of the Donlin Gold project; the sufficiency of funds to continue to advance development of Donlin Gold, including to a construction decision; perceived merit of properties; mineral reserve and mineral resource estimates; Donlin Gold's ability to secure the permits needed to construct and operate the Donlin Gold project in a timely manner, if at all; legal challenges to Donlin Gold's existing permits and the timing of decisions in those challenges; whether the Donlin Gold LLC board will continue to advance the Donlin Gold project up the value chain; the success of the strategic mine plan for the Donlin Gold project; the success of the Donlin Gold community relations plan; and the conversion of Galore Creek into a mine and the receipt of the \$75 million contingent payment from Newmont. In addition, any statements that refer to expectations, intentions, projections or other characterizations of future events or circumstances are forward-looking statements. Forward-looking statements are not historical facts but instead represent the expectations of NOVAGOLD management's estimates and projections regarding future events or circumstances on the date the statements are made. Important factors that could cause actual results to differ materially from expectations include the need to obtain additional permits and governmental approvals; the timing and likelihood of obtaining and maintaining permits necessary to construct and operate; the need for additional financing to explore and develop properties and availability of financing in the debt and capital markets; COVID-19; uncertainties involved in the interpretation of drill results and geological tests and the estimation of reserves and resources; changes in mineral production performance, exploitation and exploration successes; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, expropriation or nationalization of property and political or economic developments in the United States or Canada; the need for continued cooperation between Barrick and NOVAGOLD, the need for additional capital if NOVAGOLD determines to proceed with an updated feasibility study on its own; development and eventual construction of the Donlin Gold property; the need for cooperation of government agencies and Native groups in the development and operation of properties; risks related to construction of mining projects such as accidents, equipment breakdowns, bad weather, disease pandemics, non-compliance with environmental and permit requirements, unanticipated variation in geological structures, ore grades or recovery rates; unexpected cost increases, which could include significant increases in estimated capital and operating costs; fluctuations in metal prices and currency exchange rates; whether or when a positive construction decision will be made regarding the Donlin Gold project; and other risks and uncertainties disclosed in NOVAGOLD's most recent reports on Forms 10-K and 10-Q, particularly the "Risk Factors" sections of those reports and other documents filed by NOVAGOLD with applicable securities regulatory authorities from time to time. Copies of these filings may be obtained by visiting NOVAGOLD's website at www.novagold.com, or the SEC's website at www.sec.gov, or at www.sedarplus.ca. The forward-looking statements contained herein reflect the beliefs, opinions and projections of NOVAGOLD on the date the statements are made. NOVAGOLD assumes no obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.

Forward-looking statements are based on a number of material assumptions, including but not limited to the following, which could prove to be significantly incorrect: our ability to achieve production at any of our mineral exploration and development properties; estimated capital costs, operating costs, production and economic returns; estimated metal pricing, metallurgy, mineability, marketability and operating and capital costs, together with other assumptions underlying our resource and reserve estimates; our expected ability to develop adequate infrastructure and that the cost of doing so will be reasonable; assumptions that all necessary permits and governmental approvals will be obtained and the timing of such approvals; assumptions made in the interpretation of drill results, the geology, grade and continuity of our mineral deposits; our expectations regarding demand for equipment, skilled labor and services needed for exploration and development of mineral properties; and that our activities will not be adversely disrupted or impeded by development, operating or regulatory risks.

CAUTIONARY NOTE CONCERNING RESERVE & RESOURCE ESTIMATES

This presentation uses the terms "mineral resources", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources". Mineral resources that are not mineral reserves do not have demonstrated economic viability. You should not assume that all or any part of measured or indicated mineral resources will ever be converted into mineral reserves. Further, inferred mineral resources have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. On October 31, 2018, the SEC adopted new mining disclosure rules ("S-K 1300") that are more closely aligned with current industry and global regulatory practices and standards, including National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). NOVAGOLD has elected to comply with S-K 1300 beginning with its fiscal year ended November 30, 2021.

While S-K 1300 is more closely aligned with NI 43-101 than the prior SEC mining disclosure rules, there are some differences. Notably, unlike NI 43-101, S-K 1300 requires that resources be disclosed exclusive of mineral reserves, and that mineral resources and reserves be disclosed on the basis of our interest in them. NI 43-101 is a rule developed by the Canadian Securities Administrators, which established standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all resource estimates contained in this presentation have been prepared in accordance with NI 43-101 and the CIM Definition Standards, as well as S-K 1300.

INVESTMENT THESIS

DONLIN GOLD: A TIER-ONE ASSET IN A WORLD-LEADING JURISDICTION

Generational asset with strong,
investor-friendly attributes

SIZE

39Moz gold contained in measured and indicated mineral resources¹

GRADE

2.24 g/t Au², more than double the world average open-pit grade³

JURISDICTION

Alaska is a **world-leading mining jurisdiction⁴** with a well-established tradition of responsible mining

PARTNERSHIPS

Longstanding partnerships with Alaska Native Corporations and Barrick Gold

EXPLORATION POTENTIAL

Endowment is contained within three kilometers of an eight-kilometer-long mineralized trend, which itself is located **on less than 5%** of Donlin Gold's land position

ADVANCING THE DONLIN GOLD PROJECT UP THE VALUE CHAIN

Unlocking value from a pure play on what we and many of our largest shareholders regard as the most exciting development project in the gold industry globally

Successful strategic repositioning as a pure gold play

- 2012: Spin-out of 100%-owned Ambler project to form NovaCopper (now Trilogy Metals¹)
- 2018: Monetization of Galore Creek with 2018 sale of 50%-interest to Newmont Corp. for up to \$275M²

Our focus: maximizing shareholder value

- No financing since early 2012
- 14-year history of building value with an unwavering focus on stakeholder wealth creation; technical excellence; environmental stewardship; and social responsibility

Culture of mutual respect between NOVAGOLD, Donlin Gold and local stakeholders

- Well-established partnership with Alaska Native Corporations
- Resource development for future benefit of all stakeholders
- Employment, scholarships, workforce development and environmental and infrastructure development

[See endnotes for this slide in Appendix](#)

Advancement of Donlin Gold up the value chain

2021

NI 43-101 and S-K-1300 Technical reports

2018

Receipt of Record of Decision and major Federal permits
Monetization of Galore Creek

2017-Present

Receipt of key state permits

2017, 2020-2022

Successful drill campaigns advance Donlin Gold up the value chain

2012

Permitting commences
Spin-out of Ambler project

2011

NI 43-101 Feasibility Study

ALASKA: WORLD-LEADING MINING JURISDICTION

- 2nd largest gold-producing state in the U.S.¹
- Well-defined state permitting process
- \$4.5B value of non-fuel mineral production in Alaska (6th highest in U.S.)²
- \$1.0B in wages for careers in mining³

POSITIONED TO BECOME A MILLION-OUNCE GOLD PRODUCER

Anticipated to be one of the highest annual gold producers in the Americas

See endnotes for this slide in Appendix

*See Mineral Reserves & Mineral Resources table

DOUBLE THE GLOBAL AVERAGE GOLD GRADE

Among the world's highest-grade known open-pit gold deposits

1.04 g/t

Global average grade¹

2.24 g/t

Donlin Gold average grade²

[See endnotes for this slide in Appendix](#)

While global average gold grades are declining, **Donlin Gold's grade provides resilience** through commodity price cycles

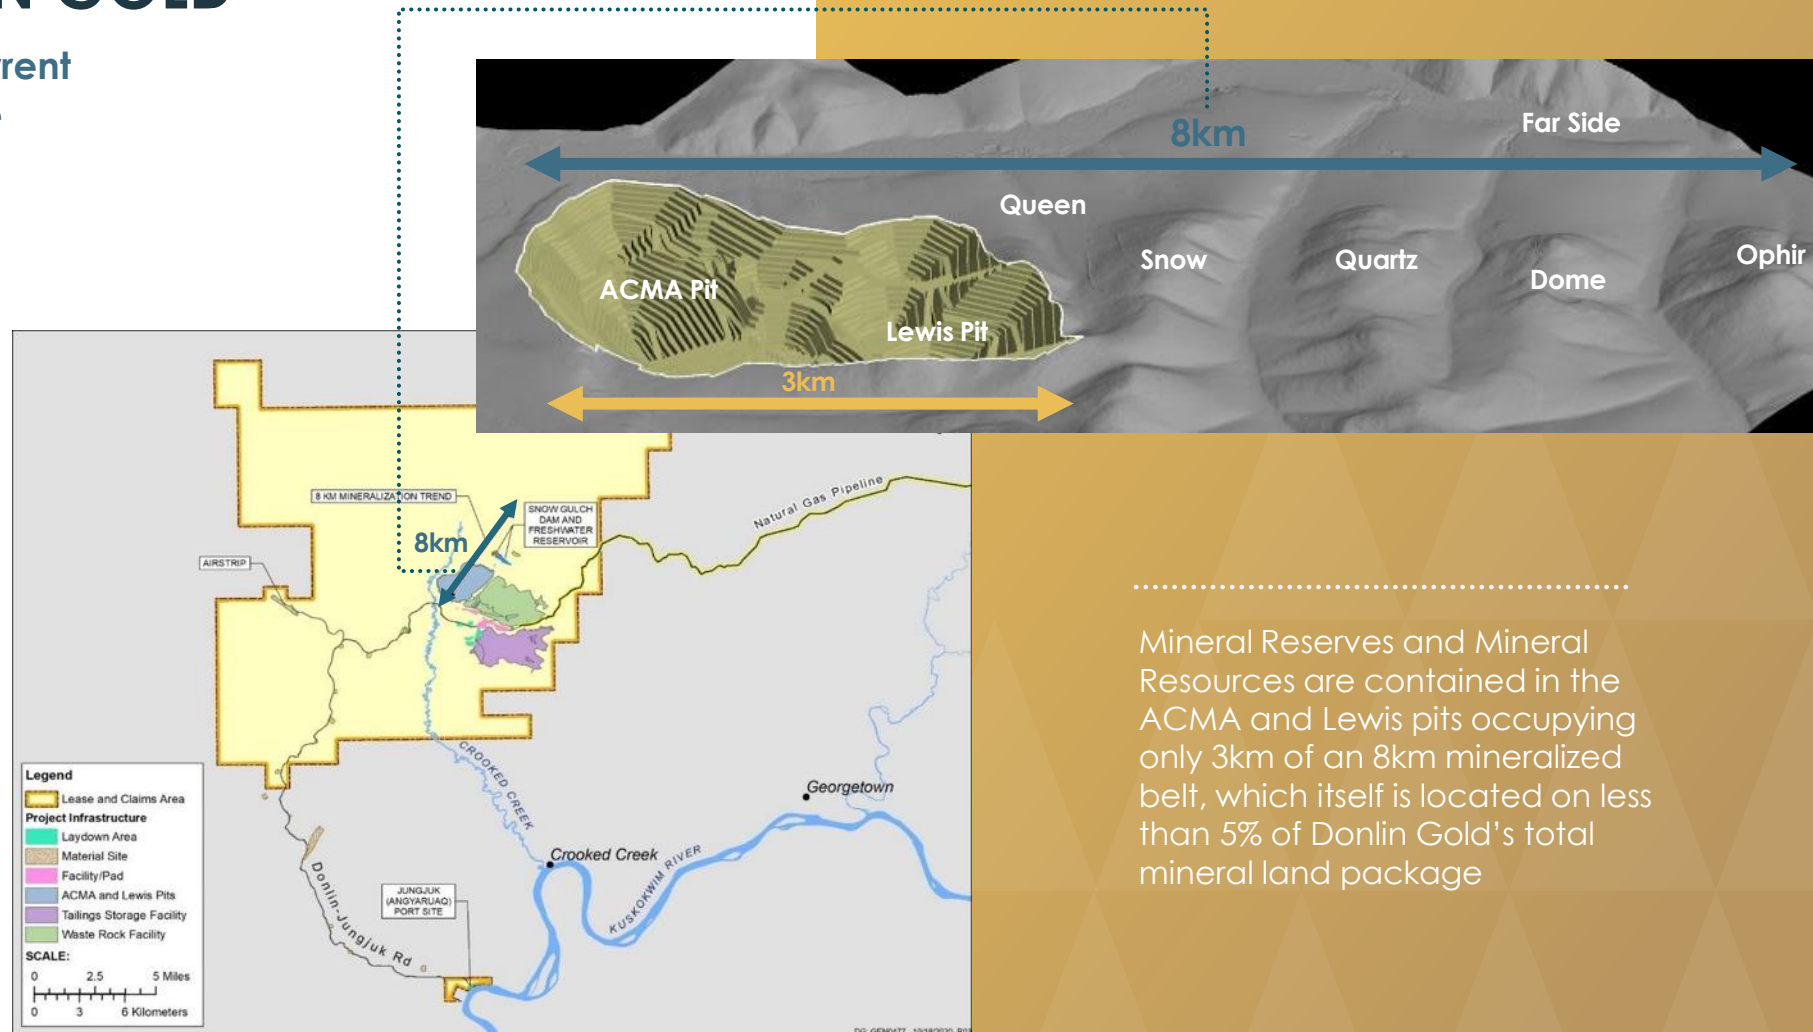

THE NEXT BIG GOLD DISCOVERY COULD BE AT DONLIN GOLD

Significant potential to expand current resource at depth and along strike

- Since inception, a total of 39Moz¹ (100% basis) have been defined in the ACMA and Lewis pits with approximately 1,400 drillholes totaling more than 339,000 meters
- Extensive exploration potential remains at depth in the pits and along strike from Queen to Ophir

[See endnotes for this slide in Appendix](#)

[*See Mineral Reserves & Mineral Resources table](#)

Mineral Reserves and Mineral Resources are contained in the ACMA and Lewis pits occupying only 3km of an 8km mineralized belt, which itself is located on less than 5% of Donlin Gold's total mineral land package

ALASKA NATIVE CORPORATION PARTNERSHIPS ELEVATE THE PROJECT

Donlin Gold is situated on private land designated by law for mining activities five decades ago and holds life-of-mine agreements with Alaska Native Corporations Calista and TKC

Resource development companies were invited by the Alaska Native Corporations, Calista and TKC, who hold life-of-mine agreements with Donlin Gold.

As landowners, Calista and TKC are committed to developing a mining operation consistent with the Elders' vision of responsible development that creates jobs and economic benefits while safeguarding the environment and culture.

The Donlin Gold Project is important to Calista because of the potential it has not only for Calista and our Shareholders but for the communities in our region. We need to provide hope for our young people. The jobs Donlin will provide at the project site and other locations will greatly help provide that hope. We are actively participating in the development of this project to ensure responsible development. Calista's priority is subsistence because it's an economy we've had for millennia, that we still rely on today and we will rely on into the future. Subsistence activities and the cash economy are interdependent now, and Donlin will help Calista Shareholders greatly in that respect. We saw it in the exploration phase when many of our Shareholders worked at the project site and used their wages to help their families acquire new boats and fishing nets."

ANDREW GUY,
PRESIDENT & CEO

**CALISTA
CORPORATION**

The Kuskokwim Corporation, TKC, has been involved every step of the way, in not only inviting Donlin Gold onto our land, but also in writing the permits, in environmental oversight, and really ensuring that this is the best possible project on our land to provide those opportunities for our shareholders, and so we have been very focused on this partnership between Donlin Gold and its partners, Barrick and NOVAGOLD, Calista Corporation and the Kuskokwim Corporation, we're all working very closely hand-in-hand."

ANDREA GUSTY,
PRESIDENT & CEO

**THE KUSKOKWIM
CORPORATION
(TKC)**

2023 YEAR-END HIGHLIGHTS

YEAR-END HIGHLIGHTS

The 2023 field program was successfully completed in July, with a total workforce of 44 direct hire employees including 63% from the Y-K region

Donlin Gold 2023 field program

- Completion of comprehensive fieldwork and geotechnical drilling required to complete the Alaska Dam Safety certification applications
- Fieldwork to further define groundwater at the site, including 1,279 m of hydrogeologic drilling with instrumentation and pump tests – important information for mine planning and design
- Lyman family's historic placer site stream and pond restoration – habitat creation advanced, with aquatic life access and use work planned for 2024
- The recently completed work was extensive and included advancing the geologic and resource models, trade-off studies, extensive analysis on key project assumptions, inputs, and design components for validation and optimization. This work is informing the next steps in taking the project further up the value chain

YEAR-END HIGHLIGHTS (CONTINUED)

Considerable outreach and engagement activities throughout the Y-K region

Community Investment & Engagement

- Provided funding and participated in various health and safety initiatives
 - Bethel Community Services Foundation
 - Special Olympics Alaska
 - Alaska Safe Riders initiative
- In its sixth year, the annual “In It For The Long Haul” waste backhaul program was a success
 - Removal of waste from fish camps in the Middle Kuskokwim
 - Initiation of waste backhaul operations along the Yukon River
 - Collected and disposed of approx. 235,000 pounds of waste
- Collaborated with Alaska Native Corporation partners on environmental initiatives
 - Planning, monitoring and assessment of salmon fisheries
 - Construction and maintenance of ice roads for remote Kuskokwim river communities
 - Annual “Clean-up Green-up” program collected and disposed of trash from 52 villages
- Partnership with Covenant House Alaska and Bethel Community Services, to create an action plan to address persistent youth food insecurity in the Y-K region
- Helped place local elders in Y-K region schools and participated in key events like the Elders and Youth statewide conference and the Alaska Federation of Natives convention
- Supported Alaska education programs, including Alaska Resource Education, Alaska School Activities Association, and the University of Alaska, promoting awareness of the state’s natural resources, and directing sports, academic, and fine arts activities statewide
- Appointed additional community liaison representatives from the local villages, expanding the total to eight
- Established Shared Values Statements with three additional villages, for a total of 16
- Conducted over 7,000 direct engagements, continuing meaningful interactions and strengthening communication channels with key stakeholders

PERMITTING UPDATE

Key Federal permits for the project have been received and State permitting is well-advanced

Federal Permitting Completed

- ✓ Final Environmental Impact Statement (EIS)*
- ✓ Joint Record of Decision (ROD) by the U.S. Army Corps of Engineers and Bureau of Land Management (BLM)*
- ✓ Section 10/404 (wetlands) and BLM Offer to Lease for pipeline*
- ✓ Pipeline and Hazardous Materials Safety Administration

State Permitting Pending

Dam safety (multi-year commitment)
Preparing preliminary design packages using field data for submittal as next step in State approval process

State Permitting Completed

- ✓ Air Quality
- ✓ Alaska Pollutant Discharge Elimination System
- ✓ Clean Water Act Section 401 Certification*
- ✓ Reclamation Plan
- ✓ Title 16 Fish Habitat
- ✓ Waste Management
- ✓ Pipeline Right-of-Way*
- ✓ Land leases, easements, and land use (non-pipeline)
- ✓ Water Rights*
- ✓ Public Right-of-Way re-locations in mine area and along access road

*Under appeal – further information provided in the following slide

CURRENT ACTIVITIES

Providing support in permitting process and efficient issuance of remaining State-level permits and defending Federal and State permits in litigation

State permitting and litigation activities

- Air quality permit was reissued
- The second of the two Right-of-Way permit appeals was denied in Alaska Superior Court and not further appealed. First appeal by Earthjustice (also denied by Superior Court) was appealed to the Alaska Supreme Court – briefing process recently completed
- Alaska Pollutant Discharge Elimination System and Waste Management Permits and Reclamation Plan Approval were extended pending reissuance – expected in 2024 or early 2025
- The Alaska Water Rights permits were upheld in Alaska Superior Court. Earthjustice appealed to Alaska Supreme Court – briefing process is underway
- The Alaska Department of Environmental Conservation Commissioner upheld the Clean Water Act Section 401 certification of the U.S. Army Corps of Engineers permit, now back in Superior Court – briefing process is underway

Federal litigation activities and bipartisan outreach campaign

- In a federal lawsuit, DOJ is continuing to defend JROD and 404 permit, finalizing Administrative Record with briefing process is underway
- Donlin Gold, The State of Alaska and Calista were granted intervenor status along with Donlin Gold and Calista for the federal litigation
- Calista, the village of Crooked Creek and Donlin Gold emphasized the project's importance to the region and comprehensive permitting process undertaken during key meetings:
 - State officials and Alaska District of the U.S. Army Corps of Engineers
 - Representatives from the Biden Administration in Washington, D.C., including senior leadership from the U.S. Department of the Interior

ESG PERFORMANCE

(Fiscal Year 2022)

Committed to Responsible Mining and Economic Development in Alaska's Y-K Region

DONLIN GOLD ENVIRONMENT

ZERO

hazardous material spills to water

ZERO

spills of 10 gallons or more to land

2,633 tonnes

CO₂ Eq (GHG) emissions (Scope 1)

26

community partners helped remove 133k lbs of hazardous waste from local villages

DONLIN GOLD SOCIAL

HEALTH & SAFETY

ZERO

lost-time incidents or fatalities

COMMUNITY

6,370

engagements with communities and stakeholders

\$3.5 Million

in payments, sponsorships, and community initiatives

PEOPLE

82%

direct hires on the Donlin Gold drill program were Alaska Natives

24

villages that Donlin Gold employees call home

UPCOMING CATALYSTS

Taking the Donlin Gold project up the value chain

- At the December 2023 Donlin Gold LLC Board meeting, NOVAGOLD proposed proceeding to an updated feasibility study while Barrick proposed continued drilling campaigns. Even though the owners did not agree to either proposal at that meeting, they found common ground on value-adding activities that advance the project
- The Donlin Gold LLC board approved a budget of \$28.5 million (100% basis) for 2024 comprising:
 - Mine planning work
 - Metallurgical test work (pilot plant)
 - Regional infrastructure support plan
 - Resource modelling
 - Geoscience hydrology and closure planning
 - Advance dam certificates & support litigation activities
 - Government affairs, community engagement & sponsorships
- The Donlin Gold LLC owners are currently holding discussions regarding the next steps and additional work beyond the approved budget

APPENDIX

MINERAL RESERVES

Donlin Gold	Tonnage	Grade	Metal content	Attributable to NOVAGOLD
GOLD	kt	g/t Au	koz Au	koz Au
Reserves¹				
Proven	7,683	2.32	573	287
Probable	497,128	2.08	33,276	16,638
P&P	504,811	2.09	33,849	16,925

- a) These Mineral Reserve estimates have been prepared in accordance with NI 43-101 and the 2014 CIM Definition Standard and S-K 1300, unless otherwise noted.
- b) Rounding as required by reporting guidelines may result in apparent summation differences between tonnes, grade, and contained metal content.
- c) Tonnage and grade measurements are in metric units. Contained gold is reported as troy ounces.

*Mineral resources reported on a 100% basis and on a 50% basis. NOVAGOLD and Barrick each own 50% of the Donlin Gold project.

Donlin Gold approximate cut-off grades
(see Mineral Resources Endnotes):

Resources²: 0.47 g/t gold

t = metric tonne
g/t = grams/tonne
oz = troy ounce
k = thousand

ENDNOTES

SLIDE 4 – Donlin Gold: A tier-one asset in a world-leading jurisdiction

1. Represents 100% of measured and indicated resources, inclusive of mineral reserves, of which 50% is attributable to NOVAGOLD. Donlin Gold is not in production and a construction decision has not been made. For more information see "Cautionary Note Concerning Reserve and Resource Estimates" and "Mineral Reserves & Mineral Resources" tables on slides 2, 22 & 23.
2. Represents average grade of measured and indicated mineral resources, inclusive of mineral reserves. See "Cautionary Note Concerning Reserve and Resource Estimates" and "Mineral Reserves & Mineral Resources" tables on slides 2, 22 & 23.
3. 2023 average grade of open-pit and underground deposits with gold as primary commodity and over 1Moz in measured and indicated mineral resources, sourced from S&P Global Market Intelligence.
4. Alaska ranks number 11 globally in the Fraser Institute Annual Survey of Mining Companies 2022, Investment Attractiveness Index.

SLIDE 5 – Advancing the Donlin Gold project up the value chain

1. As per the media release titled "NovaGold Shareholders Overwhelmingly Approve the NovaCopper Spin-Out", dated March 29, 2012.
2. As per the media release titled "NOVAGOLD Enters Agreement to Sell Its 50% Stake in Galore Creek to Newmont for up to \$275 Million", dated July 26, 2018.

SLIDE 6 – Alaska: World-leading mining jurisdiction

1. Per the US Geological Survey - Table 2- <https://d9-wret.s3.us-west-amazonaws.com/assets/palladium/production/s3fs-public/media/files/myb1-2021-gold-ert.xlsx>
2. Per the USGS Mineral Commodity Summaries report – Table 3- Value of Nonfuel Mineral Production in the United States and Principal Nonfuel Mineral Commodities Produced in 2022
3. Per Alaska Miners Association March 2023 report titled "Alaska's Mining Industry".

SLIDE 7 – Positioned to become a million-ounce gold producer

1. Anticipated annual gold production during full life of mine if put into production as contemplated in the 2021 Technical Report and the S-K-1300 Technical Report Summary. See "Cautionary note concerning Reserve & Resource Estimates" and "Mineral Reserves & Mineral Resources" tables on slides 2, 22 & 23.
2. Average of comparison group data of 14 projects based on large (3Moz proven and probable mineral reserves cut off), North/South American gold-focused development projects with >75% projected revenues from gold, as per latest company public filings and websites as of September 2023.

SLIDE 8 – Double the global average gold grade

1. 2024 average grade of open pit and underground deposits with gold as primary commodity and over 1Moz in measured and indicated mineral resources, sourced from S&P Global Market Intelligence.
2. Represents average grade of measured and indicated mineral resources, inclusive of mineral reserves. See "Cautionary Note Concerning Reserve and Resource Estimates" and "Mineral Reserves and Mineral Resources" tables on slides 2, 22 & 23.

SLIDE 9 – The next big gold discovery could be at Donlin Gold

1. Represents 100% of M&I resources, inclusive of mineral reserves, of which 50% is attributable to NOVAGOLD. Donlin Gold is not in production and a construction decision has not been made. For more information see "Cautionary Note Concerning Reserve and Resource Estimates" and "Mineral Reserves & Mineral Resources" tables on slides 2, 22 & 23.

SLIDE 17 – Maintaining a strong treasury

1. NOVAGOLD cash and cash equivalents of \$45,749, primarily held at three large Canadian domestic chartered banks with high credit ratings. Term deposits of \$80,000 denominated in U.S. dollars and held at two large Canadian domestic chartered banks with high credit ratings and maturities of less than one year.

SLIDE 18 – Extraordinary leverage to gold in a place where you can keep it

1. Donlin Gold estimates as per the 2021 Technical Report and the S-K 1300 Technical Report Summary. All dollar figures are in USD, represent 100% of the project of which NOVAGOLD's share is 50%, and reflect after-tax net present value (at 0% and 5% discount rates) of the Donlin Gold project using the reference date of start of Year -06 as the first year of discounting. Estimated owner's initial capital project development costs of approximately \$348M to be spent prior to the reference date are treated as sunk costs. At a 5% discount rate, the net present value is: (\$1,832M) @ \$1,000 gold; \$202M @ \$1,200 gold; \$1,161M @ \$1,300 gold; \$3,040M @ \$1,500 gold; \$4,887M @ \$1,700 gold; \$7,229M @ \$2,000 gold; and \$11,199M @ \$2,500 gold. The project requires a gold price of approximately \$930 per ounce to break even on an undiscounted cash flow basis and a gold price of approximately \$1,180 per ounce to break even on a 5% discounted basis.

ENDNOTES

SLIDE 19 – Strong institutional shareholder and management support

1. Shareholder positions are based on the latest 13-D, 13-F or 13-G filings as of December 31, 2023.
2. Per SEC Form 4 filings as of January 4, 2024 for NOVAGOLD's CEO and CFO under the NOVAGOLD Resources Inc. profile at <https://www.sec.gov/edgar/search/> and <https://www.novagold.com/investors/financials/>.
3. Market Capitalization based on 334.1 million shares issued and outstanding as of January 16, 2024. NOVAGOLD share price of \$2.39 as of February 20, 2024.
4. Common shares issued and outstanding, options, PSUs, and DSUs effective, January 16, 2024. See SEC Form 10-K filing dated January 24, 2024, for additional information.

SLIDES 22 & 23- Mineral reserves and Mineral resources

1. Mineral Reserves are reported within the pre-feasibility pit designs, and supported by a mine schedule, featuring variable throughput rates, stockpiling and cut-off optimization. The pit designs are contained within an optimized pit shell based on the following economic and technical parameters: Metal price for gold of \$1,200/oz; reference mining cost of \$2.16/t incremented \$0.0033/t/m with depth from the 220 m elevation (equates to an average mining cost of \$2.64/t), fixed processing cost \$13.78/t processed; sustaining capital of \$1.54/t processed; general and administrative cost of \$3.66/t processed; stockpile rehandle costs of \$0.24/t processed assuming that 45% of mill feed is rehandled; variable metallurgical recoveries by rock type, ranging from 86.7% in shale to 94.2% in intrusive rocks in the Akiwik domain; refining and freight charges of \$1.21/oz gold; royalty considerations of 4.5% NSR and \$0.50/t processed; and variable pit slope angles, ranging from 23° to 43°. Mineral Reserves are reported using an optimized block value (BV) based on the following equation: $BV = Au \text{ grade} * Recovery * \$1,200/oz - royalties \& refining costs - process operating costs - G\&A \text{ cost reported in } \$/t$. Assuming an average gold recovery of 89.5% the marginal gold cut-off grade would be approximately 0.57 g/t, or the gold grade that would equate to a \$0.001 BV cut-off at these same values. The life-of-mine (LOM) strip ratio is 5.48:1. The assumed LOM throughput rate is 53,500 t/d. The technical parameters referenced herein are based on the specifications utilized in the Donlin Creek Gold Project, Alaska, USA, as outlined in the NI 43-101 Technical Report on Second Updated Feasibility Study, effective November 18, 2011 (as amended January 20, 2012). The economic parameters are derived from the NI 43-101 Technical Report on the Donlin Gold Project, Alaska, USA, effective June 1, 2021, and the S-K 1300 Technical Report Summary on the Donlin Gold Project, Alaska, USA, effective November 30, 2021.
2. Except as noted, Mineral Resources are inclusive of Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Inferred Resources are in addition to Measured and Indicated Resources. Inferred Resources have great uncertainty as to their existence and whether they can be mined legally or economically. The cut-off date for the sample database used in the Mineral Resource estimate is 1 November 2009. However, more recent drilling data were used to validate the resource model as remaining current. Mineral Resources are constrained within a conceptual Measured, Indicated and Inferred optimized pit shell using the following assumptions: gold price of \$1,200/oz; variable process cost based on $2.1874 * (\text{sulphur grade}) + 10.6485$; administration cost of \$2.29/t; refining, freight &

marketing (selling costs) of \$1.85/oz recovered; stockpile rehandle costs of \$0.20/t processed assuming that 45% of mill feed is rehandled; variable royalty rate, based on royalty of 4.5% * (Au price – selling cost); and a variable metallurgical recovery depending on the host rock type ranging from 86 to 94%. Assuming an average recovery of 89.5% and average S% grade of 1.07, the marginal gold cut-off grade is 0.47 g/t. These technical and economic parameters are those that were used in the Donlin Creek Gold Project Alaska, USA, NI 43-101 Technical Report on Second Updated Feasibility Study, effective November 18, 2011 (as amended January 20, 2012) to establish reasonable prospects of eventual economic extraction. Based on the QP's review of the estimate, there would be no material change to the Mineral Resources if the gold price were updated to \$1,500/oz and other economic parameters were updated to the 2020 parameters used in the Mineral Reserve estimate. As a result, the Mineral Reserve and Mineral Resource estimates shown above remain unchanged from the 2011 estimates contained in the prior technical report. See "Cautionary Note Concerning Reserve & Resource Estimates" on slide 2.

Technical Reports and Qualified Persons

The documents referenced below provide supporting technical information for the Donlin Gold project.

Project	Qualified Person(s)	Most Recent Disclosure
Donlin Gold	Kirk Hanson, MBA, P.E. Michael Woloschuk, P.Eng. Henry Kim, P.Geo. Wood Canada Limited	"NI 43-101 Technical Report on the Donlin Gold Project, Alaska, USA" prepared by Wood Canada Limited, effective June 1, 2021. "S-K 1300 Technical Report Summary on the Donlin Gold project, Alaska, USA" dated November 30, 2021.

Paul Chilson, P.E., who is the Manager, Mine Engineering for NOVAGOLD and a "qualified person" under NI 43-101 and S-K 1300, has approved the scientific and technical information contained in this presentation.
