NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited, US dollars in thousands except per share amounts)

NOTE 1 - NATURE OF OPERATIONS AND BASIS OF PRESENTATION

These interim condensed consolidated financial statements are presented in United States dollars and have been prepared in accordance with accounting principles generally accepted in the United States (US GAAP). Previously, the Company prepared its financial statements under International Financial Reporting Standards (IFRS) for reporting as permitted by security regulators in Canada, as well as in the United States under the status of a foreign private issuer as defined by the United States Securities and Exchange Commission (SEC). At the end of the second quarter of 2013, the Company determined that it no longer qualified as a foreign private issuer under the SEC rules. As a result, beginning December 1, 2013 the Company is required to report with the SEC on domestic forms and comply with domestic company rules in the United States. The transition to US GAAP was made retrospectively for all periods from the Company's inception.

NOVAGOLD RESOURCES INC. and its affiliates and subsidiaries (collectively, "NOVAGOLD" or the "Company") operates in the mining industry, focused on the exploration for and development of gold and copper mineral properties. The Company has no operations or realized revenues from its planned principal business purpose, and in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 915 "Development Stage Entities" and SEC Industry Guide 7, presents its financial information as an Exploration Stage Company.

The Company's principal assets include a 50% interest in the Donlin Gold project in Alaska, U.S.A. and a 50% interest in the Galore Creek copper-gold-silver project in British Columbia, Canada.

The interim Condensed Consolidated Financial Statements ("interim statements") of NOVAGOLD are unaudited. In the opinion of management, all adjustments and disclosures necessary for a fair presentation of these interim statements have been included. The results reported in these interim statements are not necessarily indicative of the results that may be reported for the entire year. These interim statements should be read in conjunction with NOVAGOLD's Consolidated Financial Statements for the year ended November 30, 2013. The year-end balance sheet data was derived from the audited financial statements and certain information and footnote disclosures required by US GAAP have been condensed or omitted.

The functional currency for the Company's Canadian operations is the Canadian dollar and the functional currency for the Company's U.S. operations is the U.S. dollar. References to "\$" refer to United States currency and "C\$" to Canadian currency.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of estimates

The preparation of the Company's interim Condensed Consolidated Financial Statements in accordance with US GAAP requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. The more significant areas requiring the use of management estimates and assumptions related to: estimates of gold and copper production that are the basis for future cash flow estimates utilized in impairment calculations; environmental, reclamation and closure obligations; estimates of fair value for asset impairments (including impairments of mineral properties and investments); employee benefit liabilities; valuation allowances for deferred tax assets; reserves for contingencies and litigation; and the fair value and accounting treatment of financial instruments including marketable securities and derivative instruments. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results will differ from these amounts estimated in these financial statements.

Principles of consolidation

The Company's interim Condensed Consolidated Financial Statements include NOVAGOLD RESOURCES INC. and its wholly owned subsidiaries, NOVAGOLD Canada Inc., Copper Canyon Resources Inc., NOVAGOLD US Holdings Inc., NOVAGOLD Resources Alaska Inc., NOVAGOLD USA Inc., and AGC Resources Inc. All inter-company transactions and balances are eliminated on consolidation. The Company also consolidates variable interest entities when the Company is the primary beneficiary.

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited, US dollars in thousands except per share amounts)

The functional currency for the Company's Canadian operations is the Canadian dollar ("C\$") and the functional currency for the Company's U.S. operations is the U.S. dollar.

Cash and cash equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents. The Company's cash equivalent instruments are valued based on quoted market prices in active markets classified within Level 2 of the fair value hierarchy established by FASB guidance for Fair Value Measurements. Restricted cash is excluded from cash and cash equivalents and is included in other long-term assets.

Mineral properties

Mineral property expenditures include the costs of acquiring licenses and costs associated with exploration and evaluation activity. Mineral property expenditures are expensed as incurred except for expenditures associated with the acquisition of mineral property assets through a business combination or asset acquisition.

Investment in affiliates

Investments in unconsolidated ventures that we have the ability to exercise significant influence over, but not control, are accounted for under the equity method and include the Company's investments in the Donlin Gold project and the Galore Creek project. The Company identified Donlin Gold LLC and Galore Creek Partnership as Variable Interest Entities (VIEs) as these entities are dependent on funding from their owners. All funding, ownership, voting rights and power to exercise control is shared equally on a 50/50 basis between the owners of each VIE. Therefore, the Company has determined that it is not the primary beneficiary of either VIE. The Company's maximum exposure to loss is its investment in Donlin Gold LLC and Galore Creek Partnership.

The equity method is a basis of accounting for investments whereby the investment is initially recorded at cost and the carrying value is adjusted thereafter to include the investor's pro rata share of post-acquisition earnings or losses of the investee, as computed by the consolidation method. Cash funding increases the carrying value of the investment. Profit distributions received or receivable from an investee reduce the carrying value of the investment.

These investments are non-publicly traded equity investees in exploration and development projects. Therefore, the Company assesses whether there has been a potential impairment triggering event for other-than-temporary impairment by testing the underlying assets of the equity investee for recoverability and assessing whether there has been a change in the development plan or strategy for the project. If we determine underlying assets are recoverable and no other potential impairment conditions are identified, then our investment in the equity investee is carried at cost. If the other underlying assets are not recoverable, we record an impairment charge equal to the difference between the carrying amount of the investee and its fair value. We determined fair value based on the present value of future cash flows expected to be generated by the project. If reliable cash flow information is not available, we determine fair value using a market comparable approach.

Stock-based payments

The Company operates a stock option plan and a performance share unit plan, under which the entity receives services from employees as consideration for equity instruments (options or shares) of the Company. The fair value for the options and share units are recognized in earnings over the related service period. The total amount to be expensed related to options is determined by reference to the fair value of the options granted including any market performance conditions and the impact of any non-vesting conditions; and excluding the impact of any service and non-market performance vesting conditions.

Non-market vesting conditions are included in assumptions about the number of options that are expected to vest. At the end of each reporting period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting conditions. It recognizes the impact of the revision to original estimates, if any, in profit and loss, with a corresponding adjustment to equity. The fair value of stock options is estimated at the time of grant using the Black-Scholes option pricing model, and the fair value of the PSUs is measured at the grant date using a Monte Carlo simulation, which takes into account, as of the grant date, the fair market value of the shares, expected volatility, expected dividend

yield and the risk-free interest rate over the life of the PSU, to generate potential outcomes for stock prices which are used to estimate the probability of the PSUs vesting at the end of the performance measurement period.

The cash subscribed for the shares issued when the options are exercised is credited to share capital (nominal value) and share premium, net of any directly attributable transaction costs.

The Company grants directors deferred share units (DSUs), whereby each DSU entitles the directors to receive one common share of the Company when they retire from the Company. The fair value of the DSUs is measured at the date of the grant in amounts ranging from 50% to 100% of directors' annual retainers at the election of the directors. The fair value is recognized in consolidated statement of income (loss) over the related service period.

Net income (loss) per common share

Basic and diluted income (loss) per share are presented for Net income (loss) and for Income (loss) from continuing operations. Basic income (loss) per share is computed by dividing Net income (loss) or Income (loss) from continuing operations by the weighted-average number of outstanding common shares for the period. Diluted income per share reflects the potential dilution that could occur if securities or other contracts that may require the issuance of common shares in the future were converted. Diluted income per share is computed by increasing the weighted-average number of outstanding common shares that would be outstanding after conversion and adjusting net income for changes that would result from the conversion. Only those securities or other contracts that result in a reduction in earnings per share are included in the calculation.

Recently Issued Accounting Pronouncements

Foreign Currency Matters

In March 2013, ASC guidance was issued related to Foreign Currency Matters to clarify the treatment of cumulative translation adjustments when a parent sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity. The updated guidance also resolves the diversity in practice for the treatment of business combinations achieved in stages in a foreign entity. The update is effective prospectively for the Company's fiscal year beginning December 1, 2015. The Company does not expect the updated guidance to have an impact on the consolidated financial position, results of operations or cash flows.

Use of Estimates

The preparation of the Company's Consolidated Financial Statements in accordance with US GAAP requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. The more significant areas requiring the use of management estimates and assumptions related to: estimates of gold and copper production that are the basis for future cash flow estimates utilized in impairment calculations; environmental, reclamation and closure obligations; estimates of fair value for asset impairments (including impairments of mineral properties and investments); employee benefit liabilities; valuation allowances for deferred tax assets; reserves for contingencies and litigation; and the fair value and accounting treatment of financial instruments including marketable securities and derivative instruments. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results will differ from these amounts estimated in these financial statements.

NOTE 3 – SEGMENTED INFORMATION

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer that makes strategic decisions. The Company has one operating segment in exploration and development of mineral properties. The Chief Executive Officer considers the business from a geographic perspective considering the performance of our business units. Segment information is provided on each of the material projects individually in Note 5.

Galore Creek Partnership

The Galore Creek Partnership was formed in May 2007. Teck earned its 50% interest in the Galore Creek project upon completion of its funding commitment of C\$373,300 in June 2011. Commencing June 2011, the partners have funded the project costs on a 50/50 basis.

Changes in the Company's 50% investment in the Galore Creek Partnership are summarized as follows:

Convertible notes

Holders of the convertible notes ("Notes") have the right to require the Company to repurchase all or part of their Notes on May 1, 2013, or upon certain fundamental corporate changes, at a price equal to 100% of the principal amount of such Notes plus any accrued and unpaid interest ("Put option"). Due to the Put option, the Company did not have the unconditional right to defer settlement of the liability for more than 12 months as of December 31, 2013 and recorded the instrument, comprising the embedded derivative and the convertible notes as a current liability on the Balance Sheet.

On May 2, 2013, the Company purchased \$72,821 of the principal amount of its Notes, pursuant to the Put Option on May 1, 2013. The Company allocated \$58,017 to the repayment of the debt portion and \$14,804 was allocated to the embedded derivative portion of the note. Following the Company's purchases of the Notes, \$22,179 of the principal amount of the Notes remain outstanding and due on May 1, 2015. The terms and other provisions of the indenture governing the Notes remain unchanged.

Convertible notes – Embedded derivative

The conversion price of the Notes is denominated in U.S. dollars, a currency different from the functional currency of the Company. Therefore, an embedded derivative liability is recorded at fair value and re-measured each period with the movement being recorded as a gain or loss in Net income (loss).

Warrants – Derivative

The Company's functional currency is the Canadian dollar and it had issued and outstanding warrants with an exercise price denominated in U.S. dollars. The Company determined that such warrants with an exercise price denominated in a currency that is different from the entity's functional currency were classified as a derivative liability based on the evaluation of the warrant's settlement provisions, and carried at their fair value. Any changes in the fair value from period to period have been recorded as a gain or loss in the Net income (loss).

In the first quarter of 2013, all of the Company's remaining warrants were exercised and the Company realized a loss on derivative liability of \$2,461 for the period ended May 31, 2013.

NOTE 8 - FAIR VALUE ACCOUNTING

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the significance of the inputs used in making the measurement. The three levels of the fair value hierarchy are as follows:

- *Level 1* Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- *Level 2* Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and
- *Level 3* Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company's cash equivalents are held with two large Canadian banks, each with an S&P rating of AA-. The cash equivalents are classified as Level 2 of the fair value hierarchy as they are owed to the Company by the Canadian banks and are not traded in an active market.

The Company's marketable equity securities are valued using quoted market prices in active markets and as such are classified within Level 1 of the fair value hierarchy. The fair value of the marketable equity securities is calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company.

The derivative and embedded derivative are valued using Black-Scholes pricing models and are considered Level 3 financial instruments in the fair value hierarchy because the valuation models have significant unobservable inputs.

NOTE 11 – DISCONTINUED OPERATIONS

On April 30, 2012, the Company completed a plan of arrangement under the Nova Scotia Companies Act pursuant to which it spun-out NovaCopper Inc. ("NovaCopper"), a wholly-owned subsidiary of the Company which held the Ambler assets in Alaska, to the Company's shareholders (the "Arrangement"). Under the Arrangement, each shareholder of the Company received one share of NovaCopper for every six shares held of the Company. The Company did not realize any gain or loss on the transfer of the Ambler assets including \$40,200 of working capital and the Upper Kobuk Mineral Project.

On November 1, 2012, the Company completed the sale of its wholly owned subsidiary, Alaska Gold Company LLC (AGC), which owned the Rock Creek project in and around Nome, Alaska to Bering Straits Native Corporation (BSNC) for \$5,965. The Company received \$1,000 cash and a \$4,965 (face value) note receivable bearing 3% interest payable over five years. The Company also transferred the remaining Rock Creek closure reclamation deposit of \$13,400 to BSNC, which assumed full responsibility and liability for the remainder of the Rock Creek reclamation activities as requested by the State of Alaska.

The Company has accounted for the financial results associated with the spin-out of NovaCopper and the Ambler assets and the former operations of AGC and the Rock Creek project as discontinued operations in these consolidated financial statements and has reclassified the related amounts for prior periods.

NOTE 12 - NET INCOME (LOSS) PER COMMON SHARE

Basic income (loss) per common share is computed by dividing income (loss) available to the Company's common shareholders by the weighted average number of common shares outstanding for the period. Diluted income per common share is computed similarly to basic income per common share except that income from continuing operations is adjusted to exclude gains that would be eliminated if potentially dilutive common shares had been issued and the weighted average common shares outstanding is increased to include the number of additional common shares that would have been outstanding if the potentially dilutive common shares had been issued.

NOTE 16 – COMMITMENTS AND CONTINGENCIES

General

The Company follows ASC guidance in determining its accruals and disclosures with respect to loss contingencies. Accordingly, estimated losses from loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Obligations under investments in affiliates
